

# INF-2301 – Mandatory Assignment 1

Hand in evaluation for Student ID: AEI034

## Evaluation Result: PASSED

All in all a very good hand-in. Your report explains how your server works in a good way. However, I would have liked a more detailed explanation on how you parse request messages.

Also, try to keep your reports more objective by using third person singular and passive voice sentences. That way, you focus the report on the solution, and not yourself.

The rest of your hand-in is very well done, however. NICELY DONE! 😊
